

**Leeder
Analytical**

2022 Training Courses

With the New Year approaching now is the time to think about improving your skill base.

Leeder Analytical has a purpose-built training facility combining theory with practice. Our courses are structured with a combination of classroom-based presentations and practical exercises. Our trainees will be able to handle parts and consumables to gain a better understanding and confidence on how things work.

Training is provided for all levels of experience, whether you are an absolute beginner or advanced in certain areas looking to expand knowledge. Certificates are provided at the end of each course.
